5. What are the best things about the module?			
Dr Dabrera is an amazing consultant. This has been the most enjoyable firm I've had in my time at BL			
Rheumatology clinics were very varied and useful. Good opportunity to take histories.			
Rheumatology teaching was very well structured and always happened on time as timetabled. Orthopaedics teaching was also very good but would have preferred not to have in evening, though it is okay since we were living onsite and understand patient commitments.			
Saw alot of complex patients which covered a lot of our learning objectives.			
Teaching			
the consultants.			
The rheumatology aspect of the placement was great, including the two tutorials we had every week. While orthopaedics was good and the consultants and doctors were all very friendly, I felt like we didn't receive much teaching, with only one xray session a week.			
Very comprehensive and easy to understand timetable with a good mix of theatre, orthopaedic and rheumatology clinics.			
Very friendly and supportive working environment Lots of time spent with the lead clinicians Lots of organised teaching time Felt comfortable asking questions			
6. In what way could the module be improved?			
A more structured timetable which included orthopaedics.			
Maybe have structured clinical skill sessions to go through loco examinations. As in orthopedic we had no opportunity to			
More orthopaedic teaching.			
More time on the ward to practice clerking patients/examinations Spend some time with the on-call team to see what happens with an acute orthopaedic or rheumatological presentation			
Orthopaedic teaching was haphazard. I got the impression the only reason scheduled teaching happened was because we persistently e-mailed the previous day to confirm. Better teaching on the complications of common fractures.			
Signing in everyday is useless as things in logbook can be done 4 days max other times a whole day could be used for ssc etc. but due to signing in this was fragmented and time was wasted registering for no reason.			
Very little/ no ward time or time to practice any practical skills.			
7. Is there anything else you would like to tell us about the module?			
One consultant (XXXX) was unhelpful and rude. She also taught badly			
Rheumatology was well taught			
Very good!
