

# Group projects

- The final project will involve a group project each exploring the macroeconomic setting of one country you pick and making detailed recommendations for monetary, fiscal, or industrial policy.
- Given the current economic situation, this may involve studying and analyzing economic policy responses taken by governments in response to the Covid-19 pandemic or to rising inflation.
- We will have your analysis and recommendations in a report (due on 19 February) and presentation during the residential week.
- The analysis ought to be grounded in economic theory.
- Each group can meet around 2 times with me to discuss your ideas and results/conclusions
