

**Student Name:**

**Group:**

**Clinical Problem:**

**Structured Question:**

Problem (P):

Intervention/Exposure (I/E):

Comparison (C):

Outcome (O):

**Question type** e.g. prevalence, diagnosis, therapy, harms, prognosis:

**Most suitable primary study design** e.g. survey, case-control, prospective cohort, RCT:

**Best answer before beginning search:**

**Databases searched** (attach print-outs of searches):

**Best evidence found**

Reference:

What are the results (including confidence intervals and / or p-value)?

Are the results valid?

Can the results be applied to your patient(s), by you, in your setting?

Based on your experience, the patient's wishes and the best available evidence, **how will you proceed?**

**Completion date and Tutor sign-off**
