Wednesday QM+ ([here](#))

4 lectures (lectures [here](#))
Dermatological emergencies
Skin infections
Skin signs of systemic disease
Hair & Scalp

Thursday F2F

AM HCoE GP lectures

PM GP HCoE scenarios with actors

Friday

SSCs

GP & Dermatology Placement

Students should ensure that they fulfil the dermatology requirements whilst on their GP placement. There will be additional opportunities to attend a hospital-based consultant lead clinic throughout the year. Please refer to the GP & Dermatology logbook.

MSK Rheumatology & Orthopaedics – lectures are in the knowledge area of QMPlus ([here](#)). These should be completed throughout the placement weeks.

Geriatric Medicine – lectures and tutorials will be delivered throughout the GM placement. The timetable will be provided.

Sexual Health – lectures and workshops will be scheduled throughout the Sexual Health Week. The timetable will be provided. This week will include compulsory communication skills workshops, case-based discussions and self-directed work. You must complete the pre-reading before the workshops to get the most out of these sessions.

Ethics (on QM+)

Ethics in Paediatrics & Psychiatric Illness ([here](#))

Transplant Ethics ([here](#))

Ethics in Obstetrics & Gynaecology (Fertility & Abortion) ([here](#))

Global Health (live or QM+ [here](#))

- Introduction to Global Health
- Power, ethics, methods in global health (including decolonisation of global health)
- Global governance
- Overview of MSc in Global Public Health and Policy
- Conflict and crisis
- Policy / health systems

Ophthalmology

9 lectures in Ophthalmology area of QMPlus [here](#)

Neurology & Neuro/Stroke

Lectures in neurology area of QMPlus [here](#)

All students will have a dedicated Neurology teaching week before they complete their MDH Neurology placement which will involve live sessions.

We recommend that students complete the following lectures **before** their Neurology Placement (many of these lectures repeat outcomes that were delivered in Year 2).

Neurostroke week is a good opportunity to integrate geriatrics with neurology.

1. Introduction to Neurology
2. The Neurological History
3. Hyperkinetic Movement Disorders
4. Thunderclap Headache
5. The Neurological Examination
6. Hypokinetic Movement
7. Stroke
8. The Major Neurogenetic Syndromes
9. Examining mental status and cognition & Cortical syndromes
10. Visual Loss & Diplopia
11. Unsteadiness/Ataxia
12. Acute Confusion
13. Dizziness
14. Headaches
15. How to examine the nervous system Part 1 – Cranial Nerves
16. Fits, Faints and Funny Turns

There are other Neurology resources available on QMPlus which are optional but recommended.

1. Subacute / chronic headache
2. Space occupying lesions with focal neurology
3. Seizures
4. Spinal cord syndromes
5. Ascending weakness
6. Neurophysiology - EMG
7. Sleep Disorders
8. Spastic paraparesis
9. Memory Loss
10. Neurophysiology - EEG
11. Proximal weakness
12. Sensory symptoms
13. Neuroradiology - Case Studies

Psychiatry (on QM Plus [here](#))

All lectures and case-based discussions will be completed throughout the module. You will have a Psychiatry teaching week before the module. This will include compulsory clinical skills workshops, which will involve role-playing the following scenarios with actors

- General adult risk assessment
- Adolescent mental health
- Psychosis, Mental Health Act and Capacity
- Geriatric mental health and capacity

O&G (on QM Plus [here](#))

Lectures are available on QMPlus and should be studied mainly throughout the first week and then also throughout placement. A revision week available at the end of the module

The O&G introduction will include clinical and communication skills workshops regarding consent and intimate examinations, history taking and antenatal/labour workshops. In the summary week you will attend communication skills workshops with actors regarding difficult conversations (consolidation) and also O&G case-based discussions/revision

Paediatrics (on QM Plus [here](#))

Lectures are available on QMPlus and should be studied mainly throughout the first week and then also throughout placement. A revision week is available at the end of the module.

The Paediatrics introduction will include paediatrics prescribing and relevant workshops. The summary week will include the compulsory Paediatric BLS and revision/Q&A sessions.

You will complete case-based discussions throughout the placement

Prescribing SCRIPT Modules

10 modules

3 drug reconciliation – Patient Clinical Case Medication Review.

Mock PSA 3rd - 7th November
