

MTH5212 - Applied Linear Algebra - 2023/24

Coursework 0

This document serves as an initial guide to WeBWork, the system that will be used for submitting your coursework for this module.

Coursework 0 is not for credit, but it is strongly recommended that you do it, as it will help you familiarise with the system before the deadline for assessed Coursework 1 and 2. That way, you will be able to rectify any technical difficulties before it starts counting toward your final mark.

Please follow the instructions below. In case of insurmountable difficulties, please inform the module organiser Dr Felipe Rincón, including your QMUL Username (typically ah*****) and your Student ID Number (typically 200*****).

Step 1: Logging on

Go to the WeBWork page:

<https://webwork.qmul.ac.uk/webwork2/MTH5212-2023>

Log in using your QMUL Username (in lowercase letters) and your Student ID Number as password. For example:

username: ah19***** password: 200*****

Step 2: Coursework 0

Click on “Homework Sets” on the left panel. Select “Set 0” to access the problems of Coursework 0. This set is not for credit.

Click on Problem 1 to begin. Note that some problems are worth more points than others, and that for some problems you may have only a limited number of attempts.
