

# NOTICE TO PATIENTS

## Helping medical students

**This is a Barts and The London GP teaching practice**

Medical students are placed in this practice. You may see a medical student in addition to your doctor or nurse.

This is a very important part of their training as future doctors, and we are grateful for your help in this regard. All student activity is supervised by your doctor or nurse.

### **Your Choice**

If you prefer to see the doctor alone, **without a student** being present please tell the receptionist. This will not affect your care.
