

# NOTICE TO PATIENTS

## Helping medical students

This is a Barts and The London GP teaching practice

Medical students are placed in this practice. You may see a medical student either face to face or virtually, in addition to your doctor or nurse.

This is a very important part of their training as future doctors, and we are grateful for your help in this regard. All student activity is supervised by your doctor or nurse.

### Your Choice

If you prefer to see the doctor alone, **without a student** being present please tell the receptionist.

This will not affect your care.
