

School's research strategy

Topics to be addressed:

- How we are going to fund our research?
- How we are going to keep a healthy PhD programme?
- In which areas should we expand?
- Our hiring strategy? (ECR/MCR/Profs)
- How to make the most from human capital in the School?
- How to help those struggling with grants/research?
- EDI aspects?
- Increase visibility of the School? Outreach?
- Scientific collaborations? Large programme grants? DTAs?
- Industry contacts, impact!

More broadly:

- How we would like to see the School research-wise in 5 years time?
- Relation between undergraduate teaching and research?
- Need to diversify grant income! We have done well at EPSRC level but probably we cannot expand further in this respect!
- How we address the requests/initiatives from the Faculty?
- More involvement with the Faculty?

Next steps:

- Any suggestion. please let me know!
- I will be contacting HoGs and other key staff.
- Discuss in Town Hall meeting?
